Eco Families Story

Once upon a time there lived a family who did not care about being eco. In this family was a dad, a mum, a sister, a brother and a baby. This family was very miserable, wasteful and did not have a care in the world about the outdoors. They lived in a place called West Park and were often seen dropping litter around public areas. They always left lights on, taps running and used the heating when it was warm!

One summer day when they were on the way to school (West Park Academy) they saw a strange looking dog who had the most sparkly, emerald green eyes which tracked down those eco-friendly people. He saw the family from a distance and spotted that they were not eco-friendly people so he thought of a plan. He would follow the family through the day to see what they were doing. So sticking to his plan the dog (who was very eco-friendly) followed the family to school, here he would find out about who the family liked and disliked.

Later that day, when the school was finished he went to the house of the dis-eco family and try to convince them to be eco. However, this was not as easy as he had hoped because he couldn't let them see him so with his magical dog tag he shrank down to the size of an ant to continue with his quest to make the family eco! As you would have thought this family did very un eco things in their spare time such as sitting on the sofa watching TV, playing on their phones, iPads and laptops. Their fur eco dog had to think of another plan to try to talk to the family. Eco dog would transform back to his normal size and speak!

Five minutes later, eco dog found the courage to speak to the family "Here we go" thought eco dog. Then eco suddenly turn back to his normal size right in the middle of the family. Then all the family suddenly shouted at once "ahhhhhh who...what.... are you" eco dog then took a gulp and said confidently "my name is eco dog and I am here to teach you how to be eco" "what do you mean teach us how to be eco" said the little boy "I mean I can teach you how to put litter in the bin and how to recycle paper" said eco dog "well ok then" said the dad in a worried voice. It only took a day for the eco dog to work his magic on the family. They were so grateful that they adopted eco dog and changed their names to eco dad, eco mum, eco brother, eco sister and of course eco baby. And never again were the family not being eco. The end!
