

Year 3 Newsletter ~ Autumn 2 2018

Would you rather holiday in the Stone Age, Bronze Age or Iron Age?

This term the children have been looking into the similarities and differences of the Stone, Bronze and Iron Age. These times are prehistoric so the children needed to become historians and use clues to help them work out what life was like. Our topic started with a big bang outside with a fire and a chance to make Stone Age arrows! The children are able to identify when farming came to Britain and how this effected communities and trade. The children asked questions throughout the topic which we then needed to research to find out.

The Great North Museum

Our trip this term was to the Great North Museum in Newcastle. We enjoyed a rock workshop where children needed to identify rocks from their properties. We learnt which rocks came from volcanos! The museum was also full of interesting artefacts and had some items found from the Stone Age!

Welly walk

We had fantastic weather for our welly walk – a real winters morning! We all had wellies on and enjoyed splashing in puddles and taking advantage of the outdoors. We wanted the children to understand even in the cold weather we can still have fun outside. Class 6, with the help from Evah's dad even made a shelter!

R.E

This term we have been looking at 'has Christmas lost its true meaning?' We have been looking at the Christmas story and objects that Christians use during the religious period. We have been able to identify those Christmas traditions that are Christian and those that are not Christian.
